

JOHNSON WILBUR ADAMS, INC.

Structural Engineering

MICHAEL J. WILBUR, P.E., S.E., SECB, LEED AP BD+C

Mr. Michael Wilbur has over 38 years of structural engineering experience. In his position as Principal, Mr. Wilbur directs all structural design activities for, commercial, industrial, municipal, recreational and private development projects. Mr. Wilbur is responsible for the management of the projects from proposal development through project completion. Activities include scheduling, code review, design and analysis, review of design documents, verification of construction conformance with design documents and quality control and assurance for the structural activities for a project. He has also performed numerous structural condition assessments and prepared due diligence reports for a variety of structures including commercial buildings and bridges.

Prior to joining JWA Mr. Wilbur worked as a Consulting Engineer in the power sector with Sargent & Lundy Engineers in Chicago, IL and in the steel industry with American Bridge Division of U.S. Steel.
